Trabajó en Ecopetrol donde vivió una nueva faceta de su vida, en la cual tenía días felices y días en los que se sentía frustrada, no contaba con suficiente tiempo para el modelaje, pero aun así realizó pocos trabajos de fotos y con esto poco a poco aprendía más acerca de este medio.

En Ecopetrol decidió darle un giro a su vida y con 18 años de edad buscó nuevos horizontes, contactó a un manager de una agencia en Bogotá y ahí fue cuando comenzó su fantasía en el medio empezó a modelar en pasarelas, a trabajar con marcas importantes como Aguardiente Antioqueño, Marlboro, Cy Zone, Ron Medellín, Esencial Jeans entre muchos más; "cada vez que me subía a una pasarela sentía la necesidad de dar todo de mí, pues tu eres la imagen y a ti es a quien se llevan" , y aunque no es fácil vincularse siempre tuvo persistencia , tanto que todos sus logros se vieron retribuidos cuando empezaron a reconocerla, salir en televisión fue uno de sus primeros logros, en periódicos, en revistas y entrevistas de emisoras como Olímpica, Play Radio, Tropicana , esto fue lo que ayudo a Ángela a darse cuenta que amaba lo que hacía .

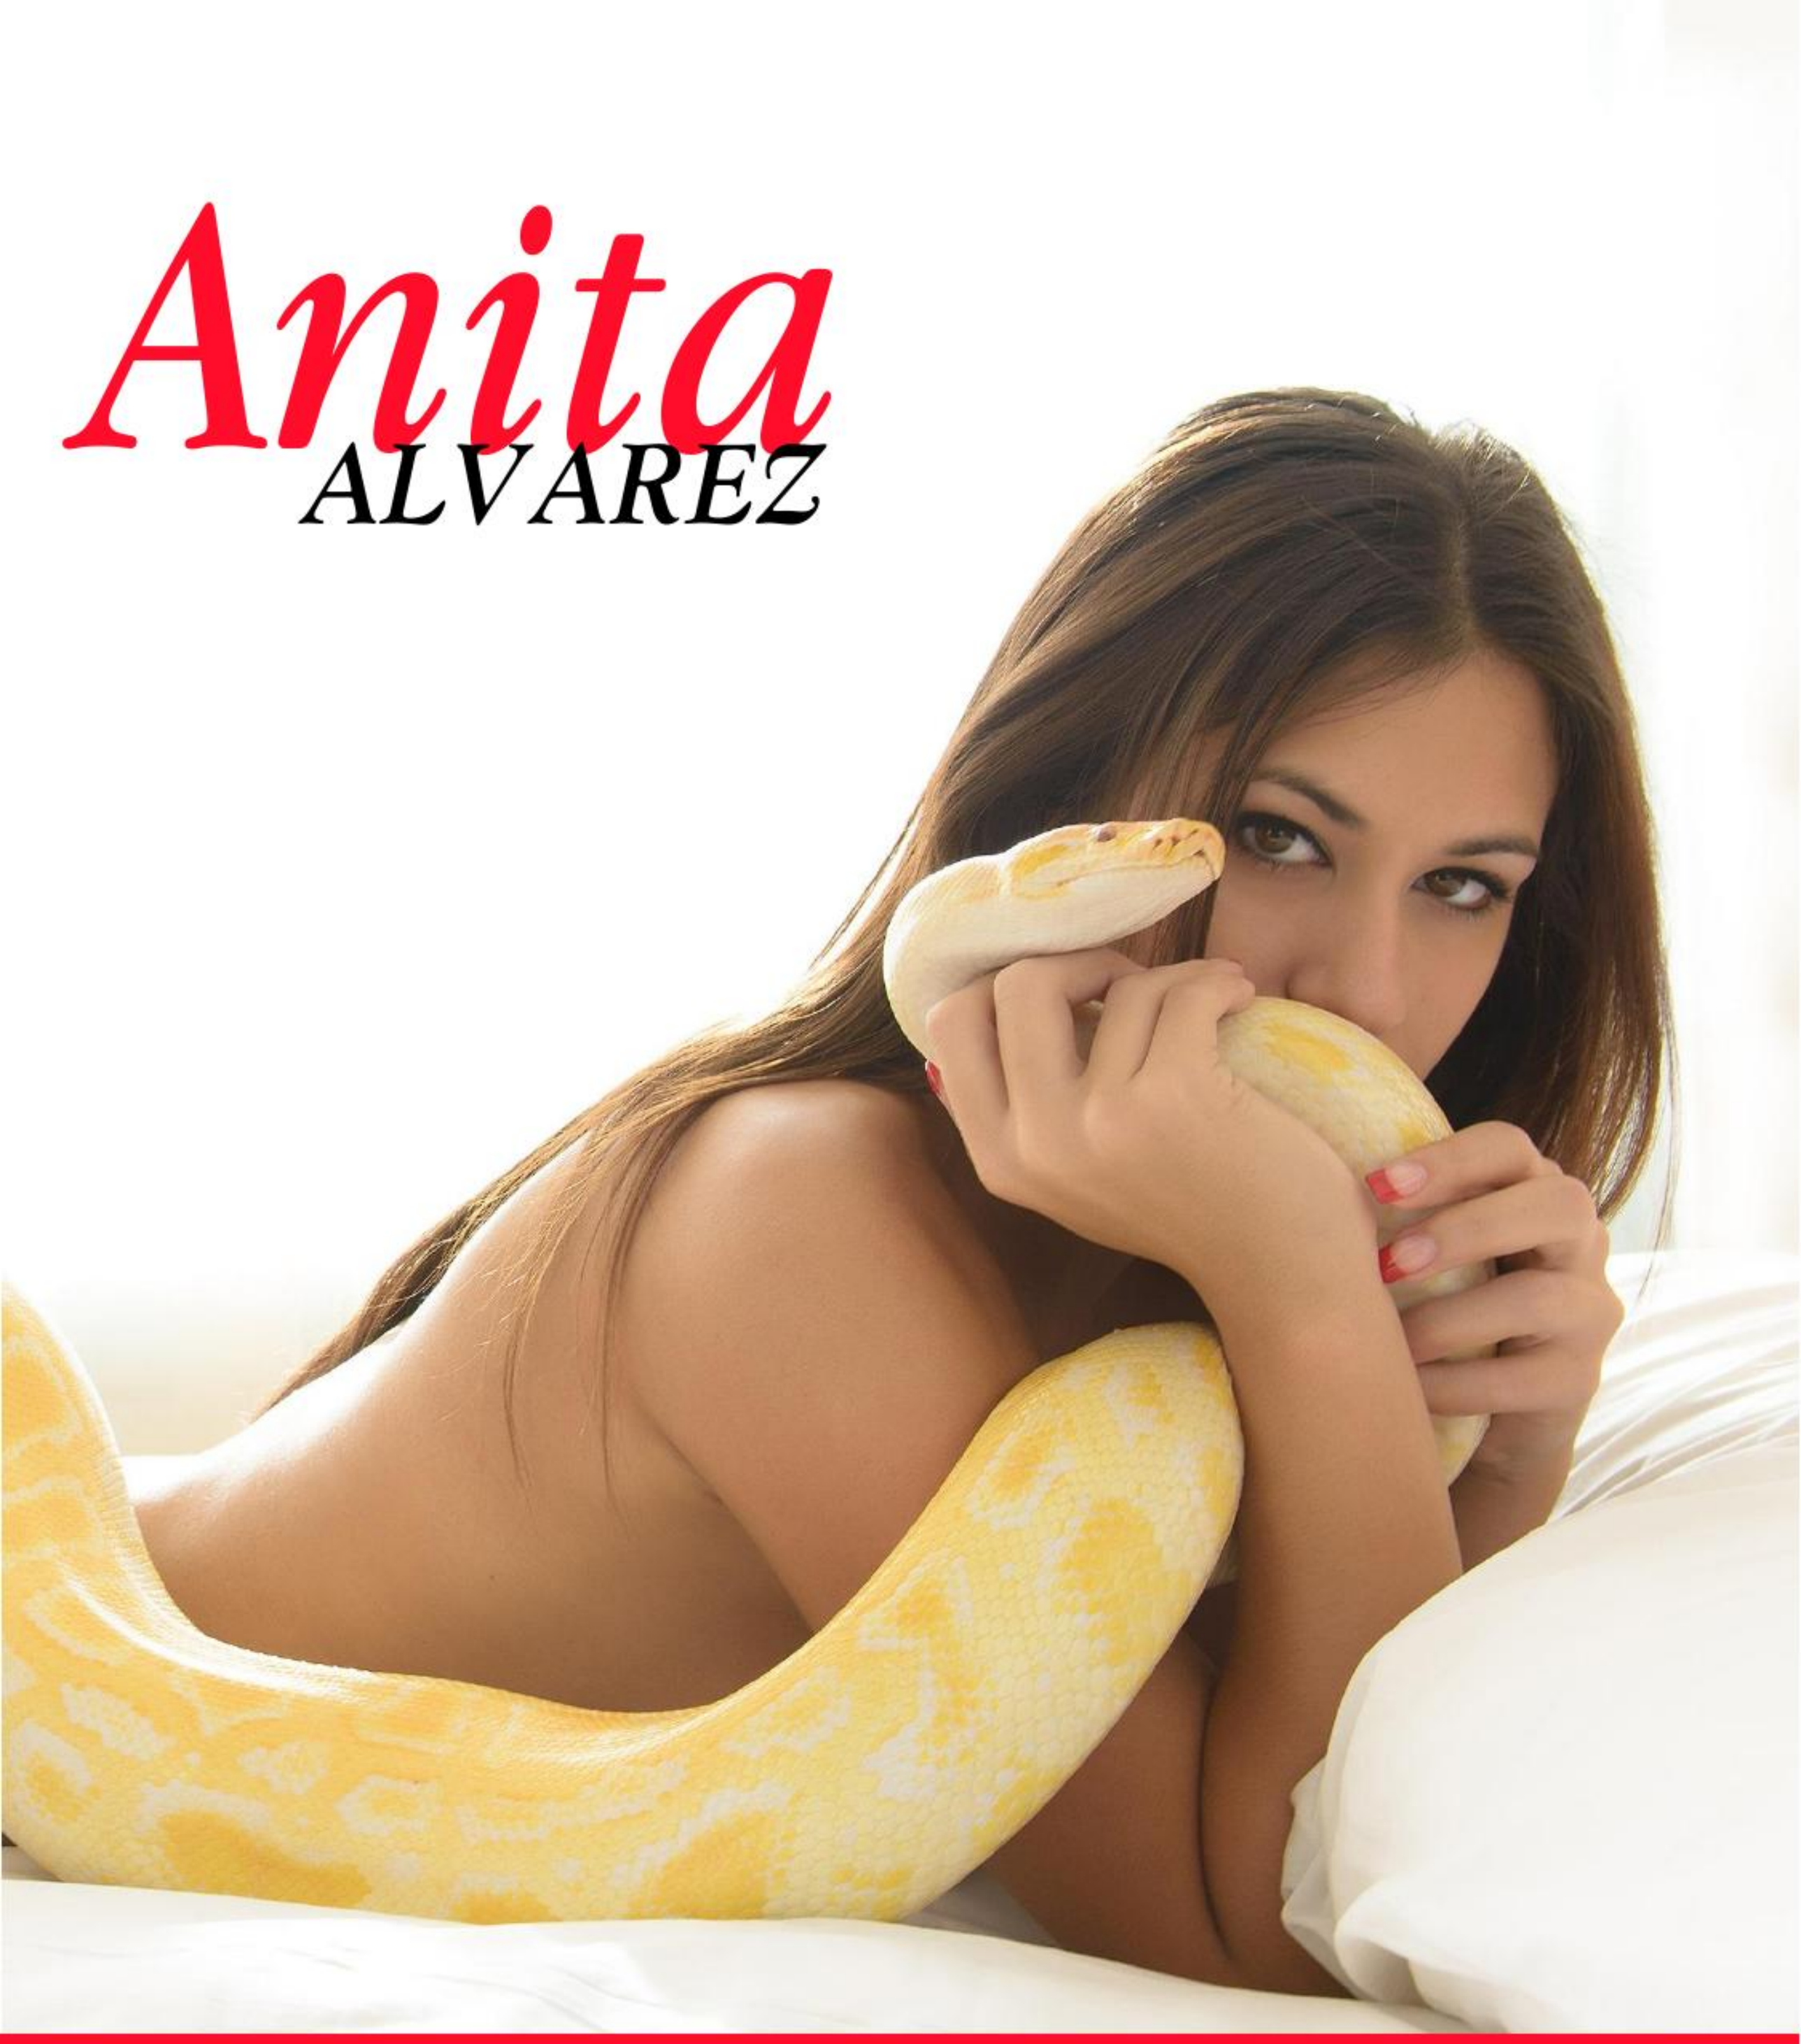
JULY 2015

Anita
ALVAREZ



Born in Barcelona, 22 years old, height 1.75, measures 87-63-98 .

«I started as a model five years ago, with a photographer that I met, and all my first sessions were with him. I was gradually learning and enrolled in a fashion website. From there, more sessions with other photographers, travels appeared to me.
Throughout Spain, I met models, also works appeared to me, I was gradually evolving and meeting many people in this world so far.

I have been fortunate to work with great national photographers. I've realized that as a model I'm not even the same as when I started; I changed a lot to better, trying to beat myself every day and get better results. I am very picky with myself and I like to take my very best in every picture.

I am passionate about be a model, it's like a hobby for me, because I really enjoy it.

Currently I don't do many jobs as I have become more selective and I have to look in great detail if I should or not do whatever they propose me, and it has to be something new to stand on my record or if is different from what already I have.

Of the jobs that appeared to me, I marched in several fashion shows, one of bodypaint in which I got the first place. Recently I was in a beauty contest. I have done many photo shoots for groups or individual, I have posted photos on a digital magazine, I have also worked as a stewardess long time, in fairs, clubs and events.

My recent works haven't been related to fashion because really live of this is very complicated, and I've been working in charge of fashion shops and supermarkets, but in the future my dream would be to work for a model firm or parade in important sites, or be an actress, something that I always have liked.»

This is Ana, a beauty of only 23 years, able to cut the breath. We know some of her, as she was cover in the Anglo version of LATIN AMERICAN MODEL in the month of November. But we want to know her a little better.

We want to know a little of your personality, how you define yourself?
I would define myself as a sexy, sincere and simple girl, I like to take care of my image and do sports.

Virtues (apart from physical)
A virtue that I think I have is that when I propose myself something I always fight and strive to achieve it.

And some little defect?
I'm very impatient, I want everything very fast.

What part of your body are you most proud of?
I like my body in general, but my waist is very thin and I have pretty hip that makes some very nice curves.

You are a woman who attracts attention. I imagine that you will have received compliments on the street... What is the funniest thing you've been told?
Once walking, a boy told me that I had dropped something and went to look what it was and he says: the angel wings... and that amused me.

What are your weapons when you are seducing?
I don't have defined weapons, but what guys most like about me is that I'm a shy but also very sweet girl and that seems very attractive to them.

What would be your perfect night?
A healthy candlelight dinner somewhere with beautiful views and an attentive and romantic guy would be great.
.

Photography: Oscar Grau Image: Marta Sáez Cano

How do you like men?
I like them tall, sincere, thoughtful, educated, loving, romantic but not too cloying, just enough.
And ... how we should conquer a beauty like you?
The guy should be sincere, caring and attentive to me and has that special something that I love.

Tell us a secret you have.
I kissed girls sometimes, but I like guys clearly.

In love, do you like to be in control or are you the type who gets carried away?

At first I let go myself a little, but I have enough character and I am a little bossy.

And in bed?

I like both, let myself go and be a little the boss.

What are your plans for the future?

I would like to work as a professional photography model and related to the fitness world, I've been doing courses of personal trainer, fitness and nutrition because I love the sport and fitness.

PEREZ

Fotografía: Pedro Rodríguez González

s 24 years old, she lives in Guadalajara (Spain), but born in Madrid, graduated at the level of Higher Technical University in Transport Management and is finishing a Master on International Commercial Trade in preparation for oppositional to customs agent.

I never was the typical girl interested in the fashion world, rather I liked more the interests of the boys, motorcycles, cars, etc ···, in that aspect I was different from all the girls, in my portfolio the cars out stand more than the models appeared in magazines.

I started to like the world of fashion at my 16 years old, since I began to combine my oily hands and my love for motorcycles, along with my motorcycle painted pink as fashion dictated. From there I started to see fashion magazines, but I always saw far away to become a model... I saw models that had many differents and very pretty pictures and think about getting there was unthinkable.

I started to take my first steps as a hostess with 18 years old, but each time they asked me more demands at work and paying worse and I got disappointed enough of this world, then I wanted to try to be an umbrella girl at Moto GP and really for me and the love I have for the motorcycles, it was an amazing experience which I repeated.

One day I decided to register myself at a beauty contest in which we were taught to parade, posing, styling, protocol etc and it was there I was encouraged and helped to start in this world. Within these classes I realized photography was what I really liked and I was the best at it. It wasn't easy to start and get good photographers who want to collaborate with you to achieve good results, however, I was lucky and I got it, I found good photographers, and very good teams, with whom I have done editorials in several publications in Spain.

Today I managed to be called to work on things like TV and internet spots, working as an actress with small roles in several television series, catalogs of major fashion brands and accessories, and even a leading global firm of hairdressing saloons hired me in many of the events they conducted at national level.

I worked in advertising making advertisements for the program El Hormiguero (the Anthill) of Antena 3, being image of a restaurant search app "Restalo", the spot of "Desperados" and the last spot of ParamountComedy.
All of this combining it with my studies and my great passion thar is the field motorcycle.

¿What is your full name?

¿In what do you spend most of the time and what hobbies do you have? Tell us briefly about yourself and your hobbies and interests.
Now with the work I have little time, but whenever I can I ride in the field motorcycle, I'm preparing to run a national championship, so I train every week. It is a very rough sport, so I also take it as a physical training to have a nice body.

¿How do you define your style, about who inspires you?
Kate Moss, I love her easygoing and carefree style, I feel identified after a long time since I was self-conscious about my small chest and she has shown that a small chest is more elegant and dresses better than a big chest.

¿Do you like animals? ¿Do you have pets?
I love them. I have a Persian kitten and I'm waiting for another kitten from the animal shelter of my city.

¿Do you dress up to to like yourself or to please others?
This is always a debate. Always to like myself, unless I'm looking for a relationship, however, but if you don't like yourself, you are never going to please others, you must know how to sell yourself and inspire confidence in yourself.

¿In an ordinary day, what do you usually wear?
Jeans, cowboy boots and sweater with shirt.

¿How is your make up in your daily life?Simple makeup, mascara, blush and lipstick nude color.

¿What do you always must have in your wardrobe?
Black pencil skirt, shorts and tops.

Yes, Higher Technical in commercial trade and marketing, Higher Technical in transportation management, Higher Technical in international commercial trade and I'm preparing for competitions to be a custom agent.

Sun, beach, sunscreen, bikini and towel ... I'm happy with that.

I don't go to parties a lot, I prefer the time for training.

¿What sports do you like?
All of the ones related to the motor world**.**

¿Do you practice any sport?
Endurance

¿Where we can continue watching your work and where can we follow you?
In Facebook, Profile Andrea Pérez or my page Andrea Pérez Model

¿Do you have any advice for young beginners or who are thinking of starting as models?
I give the advice that I would have liked to receive. You have to start small and never think you're special because an agency tells you that, because there will be many others who will tell you that you're special or anything to sell their courses, starting from the bottom you learn more and when you go up is more rewarding.

How would you describe yourself?
Impatient, simple, shy, whimsical and affectionate.

What is your best kept secret?
I have a part of me that is very masculine, which luckily combine well with the world of fashion.

At what point do you feel sexier?
When I wear heels after makeup and get dressed to go out.

What would you do to attract the man you like?
Find hobbies or any subject we have in common and exploit it.

How should one go about to conquer you?
Making me laugh.
What kind of clothes you would use in your first date?
Both classic and insinuating, maybe a dress above the knee, backless and with a side updo hairstyle.

When it's okay being intimate with a man who attracts you?
In any event, I don't agree to go out to dinner with other couples, that is a bad magic.

How do you excite your partner?
A look... couples who know and love each other don't need more.

Are you shy or you consider yourself outgoing?
I'm quite shy, but once I get loose I am very sociable.

Do you like to dress scantily clad to attract and look sexy?
Yes, always, I love to lure myself with skirts or tops.

Are you more attracted to hairy or hairless men?
Men without hair always.

Do you prefer the stronger or more delicate and loving men?
A delicate and loving man will always look for you and gets along better with a woman

Do you think that a woman should always wait for the man or woman may also propose?
The truth is that in my shyness I've never taken the first step, but it's true that a woman can also take the first step and break the rules.

What do you do when a man attracts you to get his attention?
It's important to know how to do, if is in a humble way or with topics we have in common I always keep talking to him, but if not subtly I tell him to leave.

Which part of the body of a man attracts you more?
Chest, naked torso, hairless and defined but without the obsession that today there is "not to croissants"

Which's the first thing you look in a man?
The eyes, his gaze or the way that look at me is what I love.

Do you think it's important to show your sexuality?
I show the sexuality in the intimacy of a relationship, I'm also affectionate, but even up to connect with someone they can label me as cold or hateful, I'm very mine.

Would you like to be famous, why?
No, I'm a very simple person, I don't think it would go well.

What would you do if you are famous?
Surely some business.

Is more important the physical or personality?
Both in its certain extent

Would you go out with an ugly man?
That depends, I fell in love with a personality, if we have things in common, we laugh together, etc, I think you fall in love without seeing the physical.

OSCAR GRAU

AGNES OH

Annais Ochil, better known in this world as AgnesOH. She is 23 years old, is 1.65 m and her measurements are 90-65-95.

«I was born in Cuba. Being in the modeling world helps me to disconnect from my daily routine.

From 14 years old, age that I was living in Cuba, the modeling was something that attracts me a lot, so by circumstances of life remained in the air. With 17 years old when I started working in Spain I considered the possibility again, but I didn't found anything to me, maybe I didn't look in the right places.

I was overweight without giving courage to myself, that illusion last only a few months until I gave up. But I'm stubborn and I decided to fight for it, so I started to take care of the food and do some sport, so I managed to regain a weight with which I feel comfortable and my self-esteem is much higher after much sacrifice both psychologically and physique. Nothing is easy but I had a desire and a goal to accomplish. Today, thanks to my dedication I am again in the modeling world.

At 21 years old, I started again to look for jobs online and found a model photographer from Karismamodel online magazine; that was my first job. From there, through social networks and several pages of models, I've met many photographers who have given me the opportunity to work in this world, I have learned from each one different teachings as each one shows a different style. I worked as a model in numerous shootings.

I would like to start making videos aside of photography, because I want to have more versatility as an artist; so one of my goals is also doing theater and learn as much as possible, that's something I'll look later when I see it as possible...

How do I see myself in the future? Well, my dream is to progress... just that. I want to have the opportunity to work on what I like. Do something related to fashion, modeling, art or interpretation and feel that I enjoy what I do. Make for what today is a hobby become my daily life, get up every morning thanking for doing what I really like.

I thank all the people who support me and believe in me. Both those who give me the opportunity to grow in this world and those who follow me and enjoy seeing my work.»

“I like responsible men and something that long ago that I don’t see, who knows how to conquer not only for something sexual but with sincere interest.”

Let's talk about your personality, how you define yourself?
The people have always told me and I also think I'm so flirty, I think as all women do, I like to be liked.

Do you have a little defect you hide?
Although at first look it's impossible to find, haha haha, well in one way or another we all have defects. I think my main defect is to obsess about things, for better or worse. When I want or like something, I do my best to get it and when something happens to me that I don't like I can't stop thinking about it.

What part of your body are you most proud of?
Well I would say that my legs for the simple fact that it's my engine, they let me do one of my passions, dancing and is the most grateful part in my exercises, where I notice before the results.

A beauty like you, I imagine you should stand out in the street ... Tell us a situation that has occurred to you
This came up in Cuba, many years ago, but is one of the most memorable situations that I remember.
I was going down the street and a guy who was on the bike looking and calling me fell, He didn't hurt but surely learned the lesson, obviously after seeing if he was okay, I was amused.

What is your ideal man? Uff, that is a difficult question, does he exist?

I believe that if we seek the perfect couple, we are falling into a mistake; it's very difficult to find everything perfect in another person, even when we can't find the perfection in ourselves. Well, answering to the question: Typical, a man who makes me laugh and I say with sincerity, there are guys who I didn't like at first sight and they aren't my prototype and that's why they have conquered me. It isn't only that, of course, I like responsible men and something that long ago that I don't see, who knows how to conquer not only for something sexual but with sincere interest.

What's the first thing you notice in a man?
Smile and gaze, a nice smile is my downfall and there's nothing like a knowing look, those who conceal something and tell you everything.

How we should conquer a beauty like you?
You shouldn't start saying "how beautiful and sexy I am" without knowing me when they start talking to me like this says to me too clear what they want.
You should be respectful and talk with me without being boring. It's a good start to begin conquer plus the things that I said above.

Any secret that you can confess?
I usually have my secrets well hidden, but something that I keep for myself is that sometimes I'm afraid of the future.

People say that Cuban women are very passionate. Are you?
Of course! As long as the other person forwards me to be, I'm not passionate with anyone, I use to surrender entirely if I like the other person, if not, best not approach.

Fotografía: Oscar Grau Imagen: Marta Sáez Cano

"I thank all the people who support me and believe in me. Both those who give me the opportunity to grow in this world and those who follow me and enjoy seeing my work"

In love, do you like to be in control or are you the type who is carried away?
(Laughs) I'm the one who holds the reins, I'm too demanding I think, although it may be because of the type of man I've always been in relationships.

And in bed?
I like to let myself go, the guy should be a little dominant, but often I just take charge of the situation. It depends on the time and how is the other person, it's a two way thing.

And to end... What are your plans for the future? Any next project?
In the photography I'd go ahead and doing better jobs each time and I hope get other things relating to this world.

Moreover there is a no return trip abroad that remains to be seen.

Is Cristina Rodriguez Prados, her stage name as model is Kristen Rodriguez and is 25 years old.

«I am Spanish of Granada, I was born in a small village called Peligros, but since childhood I have lived in different parts of Spain, usually the city where I live is Cordoba. I currently live in Santiago de Chile and work as a clothes and photography model.

Thanks to my work I have traveled around the entire world and have seen many countries and cultures. which makes me enjoy it immensely but I must say that I'm Spanish thoroughbred.

Before I get started in the world of fashion I had engaged in almost a professional way to the world of athletics. I have always admired very much the sports world and I think that is closely linked to the world of image and thanks to the sport I have kept a good physical and spiritual state. A couple of years ago I did a shooting for the first time in my life. And I didn't hesitate for a second the chance that gave me a Slovak agency to work professionally as a model.

From that first job was in Istanbul (Turkey) I have not stopped traveling. Frankfurt, China, South Africa, Uruguay and Argentina (Punta del Este), currently Chile and soon India. Reaching to represent my country as Miss Spain in various international competitions, doing parades and doing publicity works and appearing in numerous international online publications.

I'm very happy and grateful for everything I have achieved this year. So when Pedro Rodriguez gave me the opportunity to cross the pond to South America and the North American market with this publication I didn't have the slightest doubt, I loved the idea because I love those markets. Besides, because he's a great and prestigious professional and a better person, I figured that this could be a great experience and very interesting results could emerge.

Professionally speaking there are many branches in which I am comfortable, although the one that best suits my qualities is photography whether publishers, catalogs, lookbooks as well as fashion-shows, I love that world but the interpretation also called my attention much and I have already had opportunities to work in small roles and music videos so I'll try it too.

I thank all my family and of course my parents who have always supported me. As well as the large number of professionals who have given me the opportunity to grow in this world. I think we have to fight for our dreams and in my case I have gradually been getting what I plan always with the utmost humility. I feel blessed.

I hope this has been pleasant and you like my pictures and my image and again I thank Peter and the entire team of LAM GOLD for the opportunity of this interview and publication.

Sarah
COCCON

Born in Valladolid, Spain, on March 5, 1992.

Professional advertising photo model and fashion runway began her career in fashion in early 2014 when the last year of nursing college decided to send her photos to the modeling agency Promodelia in Madrid and pursue her true vocation, it was there where she began training as a photographic and fashion runway model and giving her first steps.

Despite she has little time dedicated to this profession, this model with almost perfect measurements has an enviable curriculum, she has done fashion editorials for Moli de la Llum of Barcelona, the Accademia del Lusso of Milan and Latin American Model magazine, has worked for the designer Amalia Pacheco making her autumn-winter 2014 collection catalog, has worked in workshops with photographers as Xavi Carol, Riders of Light and the Association of Photographers of Madrid and Alfonso Bustos and we can see her in the charity calendar 2015

that is made annually by Ojo de Pez Fotógrafos (Photographers Fisheye) and the photo exhibition “La guarida de las hadas” (The Lair of the Fairies) by the photographer Pedro Francisco Condes to be presented next year in major cities of Spain and Paris. Although this multifaceted model stands out in advertising and photography because of her effort, professionalism and ambition and beauty have made several designers overlooked her 173cm height and allow her to conquer the national fashion shows with designs made by Javier Dure, Alicia Barberan, fashion such as casual, lingerie and as OlgaPereira, MozModa, Jesus Rivero, Esencia Torera, Alicia Colino and Sandra Molaguero wearing items as couture, wedding dresses and costumes for evening proving her worth and ranking as one of the biggest fashion promises on the national scene.

Where were you born and where you currently live?
I was born in Valladolid and currently is where I live, but I spent time in Madrid where I do most of my work in fashion.

What country would you like to know? In what order?
I would love to travel around the world and is a dream pending that I will do someday. I've been in several countries especially in Europe and North Africa and hopefully soon I will go to China, India and Australia, especially to India, people who stayed there say they back different and grow as a person and aside from knowing another culture you realize how lucky you are for born in the West and valuing things that seem simple but are a luxury in other countries, in summary that helps us to change to be less selfish and want to make the world a better place.

How many languages do you speak?
Spanish, English and German

Do you think that there is much competition in fashion?
A lot, especially now with the crisis there are many girls who try their luck and unfortunately not all reach their goal, fortunately I'm proud of everything I've been getting as far as fashion is concerned and I hope to continue working on it for many years.

Do you care a lot for your hair?

Yes of course, my hair is one of my greatest strengths and a key part to enhance my beauty. I wash it daily with shampoo and nourishing mask and a couple of times a week with a mask that I make myself with natural ingredients to give it shine and prevent breakage in the end of the hair.

What is your favorite clothing style for daily, for a major event and for a party?

For daily jeans, a colorful shirt, a dark blazer with slippers and matching bag and for a party a tight dress with rhinestone details, heels and matching clutch of course.

Do you think that there are many topics in the world of models and their job?

Unfortunately yes, there are many people who think you have half neuron just for being beautiful and sometimes you have to shut up mouths but something bad had to have this job.

Do you have other studies besides this fashion thing?

Yes, I graduated in nursing in 2014 and currently work as a nurse in a hospital in my city; I combine this work with fashion.

Do you think that modeling lasts a few years and then should you change and do something else?

You have to be very lucky to get to the top in this world, you have to have many contacts and be special in some way to succeed and dedicate to it forever. In my case I think it will only last a few years so I try to make the most of the opportunities that arise and have a second job as a nurse to have a future when my luck will change.

What do you think of the controversial restrictions of some designers to models for parade their costumes? And the demands of some fashion runways, do you seem exaggerated measures?

I seem unreal absurd and insane measures, there are fashion runways that set a fixed size and height measures and if you don't fulfill they you get thrown back, with that all they get is to deny opportunities to models that don't have measures for 2 cm but worth more than many of the chosen to work and also can create eating disorders to their models because it's very difficult to maintain a size 34 measuring 1,80cm and being healthy.

At what age did you start to stand out in your job or did you realize you had good qualities for it?
I always liked the world of fashion but it was in the final year of career with 21 years when I dared to take the plunge and start as a model.

How do you define yourself in 3 words?
Persistent, impatient, lucky

What sports do you like? Do you practice any sport?
I like yoga and spinning, I have a stationary bike at home and I use it when I can't go to the gym, the truth is that I'm rather lazy but if you want to maintain firm buttocks and legs you can't stay lying on the couch.

Do you think there is in fashion a lot of distortion of reality about of the perfect physique?
In most cases yes, also perfect physique is entirely subjective, it seems that less is more, the less is your weight the more you worth as a model, it's a shame because personally I don't think that is healthy or beautiful, I prefer be slim but curvy.

What kind of photography or jobs are your fortes?
The beauty and boudoir pictures although I'm quite chameleon and I develop well in all kinds of shootings.

Do you prefer advertising photography or fashion shows and parades?
Advertising photography forever! I have more fun and the results are better but I also like to parade occasionally.

Do you think you have many friends and people who support you? Do you get good advices?
Yes of course, my lifelong friends, my couple and my family always supported me and given me encouragement, for me they are the most important.

Photography: Pedro Rodríguez González

¿Do you think that getting high is just luck and good contacts? What is the key to being recognized?
Of course, even if you have very good contacts if you aren't worthy of it you won't get anywhere, the key to success is attitude, have something special to stand out and of course good luck and good contacts.

Omaima BOUKNANE

Is 19, was born in Madrid. Presently she is living in Barcelona, a city that she loves for its climate. As a good Scorpio, is a very demanding and impulsive person. I measure 1.65 and my measurements are 85-60-90.

"From age 16 the modeling world has called me. I started buying fashion magazines and one day I said, "Why I can't be one of them?" The problem was that I had a little overweight, but as I'm bigheaded and demanding, I decided to fight for what I wanted.

I made diet and I joined a gym to achieve the desired result. I met a photographer that was starting and I did my first sessions with him. I left it for work one season and recently I returned to pick up it. I feel more and more comfortable, but I'm very demanding with me and I like to give my very best in every picture. Lately I've worked with a photographer who trusts me and with which I feel very comfortable and has all my confidence, which guides me in this world.

I've done work as a hostess at various events, and I'm currently Image Hostess at a popular nightclub in Barcelona.

I am a fighter, independent and eager to thrive in this world. If I propose something I don't stop until I get it. I consider myself self-taught as a model. I love watching fashion shows and magazines, try to observe perched to take to my terrain and give my personal touch.

Looking to the future I would love to enhance my career as a model and find some work in this sector or as an actress as the film is something that I love.

Tell us about yourself. How do you define yourself?

I consider myself a very exotic girl; peaceful, restless, sure of myself, and even having 19 years I am too savvy, which makes me bold and spicy.

Which type of photography is the one that you feel most comfortable?

I usually feel more comfortable with fashion photography, and something sexy like lingerie.

What is your best virtue?

Over time I've been realizing that my greatest virtue is patience, it makes me feel mature.

What do you carry always in your handbag?

Well ... my dressing case is very important, I always carry it with me to give a few tweaks to myself, tissues, gum, my schedule where I note my stuff.

How would be your perfect romantic night?

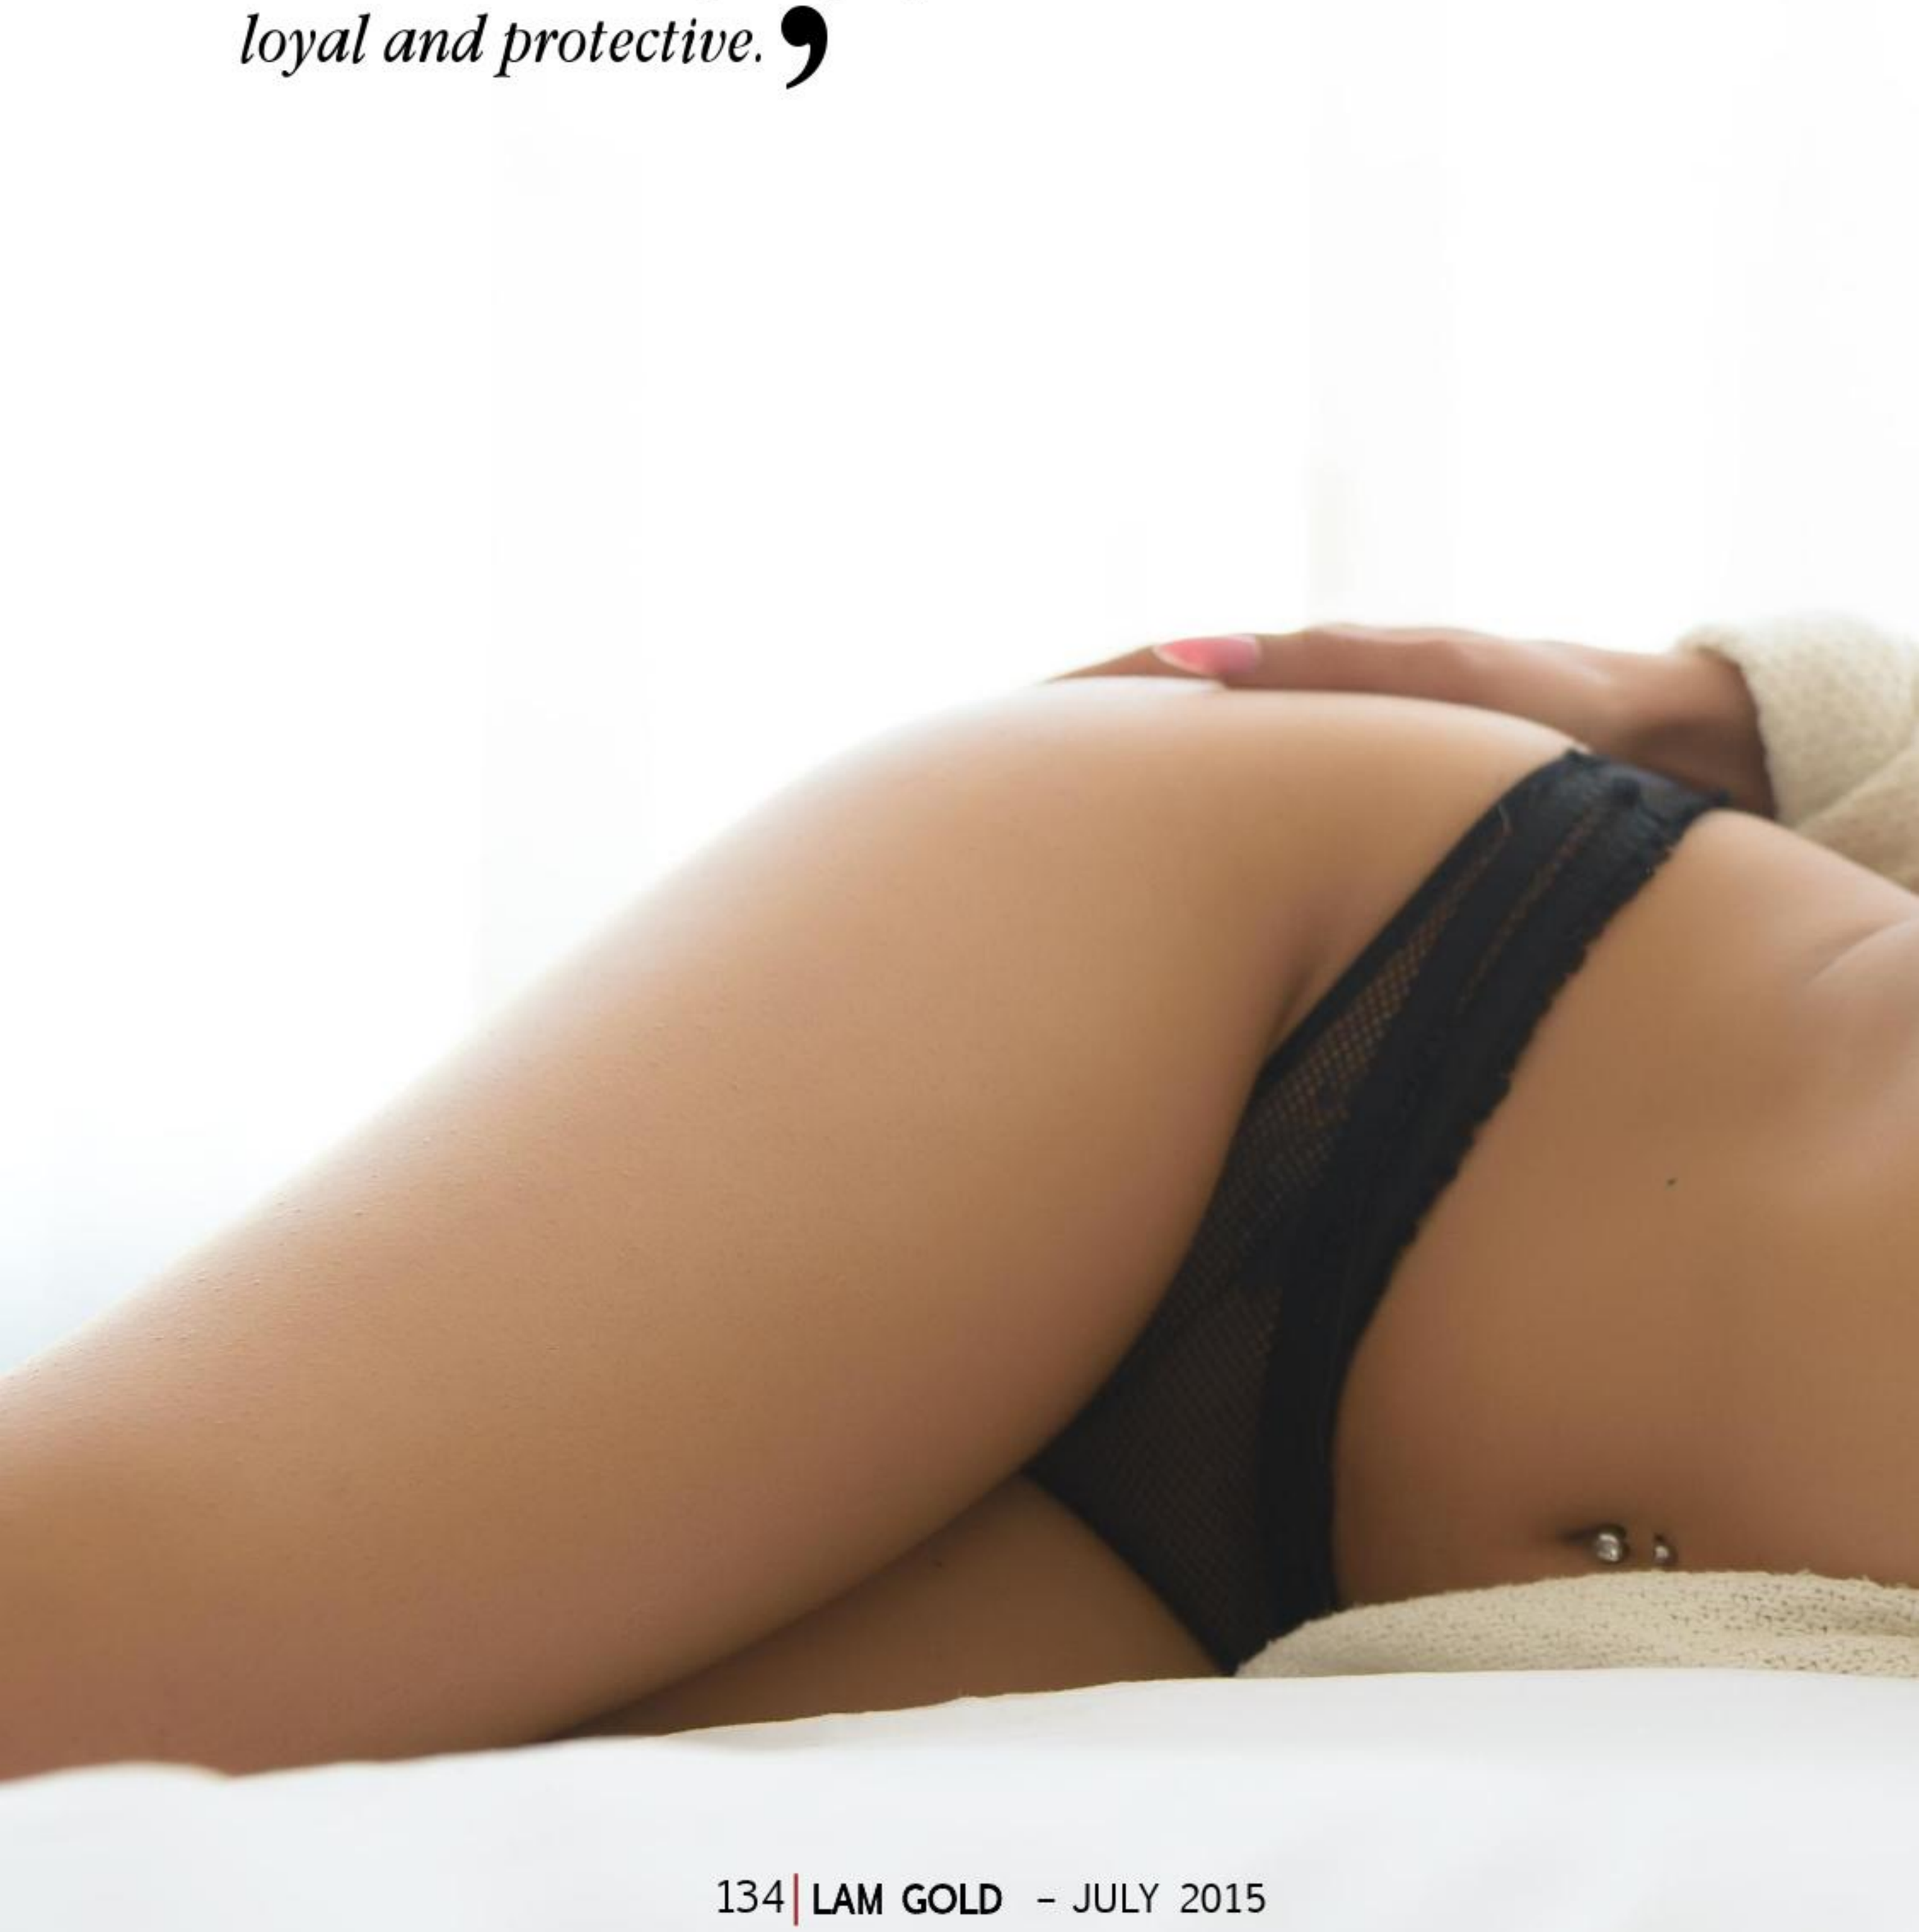
The perfect man and place ... Candles with a good aroma, sexy lingerie, a meal in the starlight and finally some strawberries and cream.

And what kind of men do you like?

I like dark men with clear eyes, athletic build, taller than me, strong and exotic features. With gentle nature, clear ideas, mature, cheerful and playful.

Photography: Oscar Grau Image: Marta Sáez Cano

“No, I'm not one to see only the physical, but at first glance he has to attract me. I'm very picky but seek them to be honest, with manners, mature, funny, spontaneous, loyal and protective.”



Are you the type who only looks at the physical or want something more in a man?
No, I'm not one to see only the physical, but at first glance he has to attract me. I'm very picky but seek them to be honest, with manners, mature, funny, spontaneous, loyal and protective.

And your weapons to seduce him?
One of my arms is the scent, the perfume, the look has to convey "Come here I'm shy", the way you dress, wear something sexy flirtatious with good heels and above all be confident.

You have many virtues, but some little defect?
Yes, I'm too big-headed and impulsive.

What part of your body do you feel the most proud?
I am very proud of my lips and my ass.

Have you ever felt bothered by some compliment or situation?
Yes, many times. I work at night and there are many men that besides compliments rush to catch your hands to dance without asking. A while ago I was flattered with they saying me things, but over time it becomes a little boring, it also depends on who gives you a compliment.

“The truth is that isn’t easy, you have to know how to take me and treat me. I'm too demanding. I like going slowly, he has to know me well. I don’t surrender to the first who come up to me.”

How should we conquer a beauty like you?
The truth is that isn't easy, you have to know how to take me and treat me. I'm too demanding. I like going slowly, he has to know me well. I don't surrender to the first who come up to me.

Tell us a little secret that you have and you can count
Mmm ... I don't like to reveal my secrets, I hope to tell you some later... I leave you with the craving.

In love how do you define yourself?
I'm sweet, romantic, mischievous, sensitive, ardent, jealous, impulsive and highly sexually active. I like to be surprised.

Do you like take the reins in a relationship?
Yes, I love to be in control and command, but I also like upside down, making the relationship more bearable.

A wish for the future?
I would love to grow professionally in the world of photography, finish all my projects and ideas and why not, make a TV ad or collaborate on a movie.

“One of my arms is the scent, the perfume, the look has to convey “Come here I'm shy”, the way you dress, wear something sexy flirtatious with good heels and above all be confident.”

THE AGE OF ADELINE

FOREVER YOUNG. ALWAYS IN LOVE

80 years ago something incredible happened to Adeline and her life stopped in time.

Adeline Marie Bouman was born on January 1908. Many years later she would start her own family but a night of severe winter of 1935 Adeline's life changed forever.

At that moment something amazing and supernatural originally occurred, something that might be called magical: Adeline would be immune to the passage of time and won't age another day.

Blake Lively and Michiel Huisman

Blake, after of GOSSIP GIRL you took a free time- What was in this film that attracted you return to the screen?

BLAKE: After Gossip Girl wrapped me, I took about a year off. I wanted a break and re-loading. I've read a lot of scripts and were a few movies that I liked and I thought, "I could do this movie." But 'Adaline' was the first script I read it and thought, "I can't not do this movie."

What do you like ABOUT it?

BLAKE: I feel the magic doesn't appear in the cinema these days unless is a superhero movie or has wands. That magic in humanity, in a quiet film, magic is very rare and when it comes, people call it "the little movie that could". 'Adaline' fits somewhere between the two - which is

death, it's about an infinite amount of time, it's attractive, but if you must be alone, isn't attractive. You realize that time is nothing without love and you want to have less time and loving people you care about, that have an infinite amount of time alone.

You have worked on 'ADALINE' with the MOVIE ICON HARRISON FORD -

How was that?

MICHIEL: I was astonished by Harrison. I was able to see the reason why he's who he is - his passion for storytelling goes beyond; It was very inspiring. We had been filming for 2-3 weeks by the time we started filming in the family Jones house and Harrison really helped us a lot in the history.

BLAKE: It was like a different movie while we were shooting those scenes, when Harrison was on set, his presence was felt.

Didn't you do anything to help establish the parent-child relationship? Did you spend more time together?

MICHIEL: actually, he met for the first time that day we started shooting, but somehow everything fell into place very quickly. We share a passion for good coffee and had a coffee machine in his trailer, so he invited me to his trailer for a coffee. So it was perfect for the parent-child bond, I think!

How you have done to discover this character Adeline?

BLAKE: I looked grandmothers for inspiration - Grandmothers that I know from my childhood and investigated the time in their history when reach "the majority" The majority of age in the 60s, which people were more a free and open spirit while my grandmother came of age in the 20s and was more formal, proper and ladylike. I thought, for Adaline adulthood in the 1920s, she would possess this formality, she would be a bit closed and a bit more reserved. The 20s was the beginning of a change for women and every decade in the past century has been very different for women - socially and politically. I wanted to capture not only that, but also Adeline has a relatively smooth transition each decade.

What is your opinion on aging? It's something to fear or something to celebrate?

BLAKE: I feel that people are more concerned with mortality than they are with aging. Aging is something that society imposes and is more an esthetic problem. Aging is innate and instinctive related to mortality and if you remove some of the surface elements, you get to realize that aging isn't sad. Adaline lost the people she loves - her daughter is 80 years old and is about to pass on. She's trapped in this reality forever. I think the film explores aging and mortality in a unique way.

Through the different ages we see different costumes; Do you have a personal preference for one of the costumes?

MICHIEL: I like the dress that Adeline wears when she and Ellis first meet, in the dancing of New Year's Eve and one of the things I love about that dress is that is the same dress she wears in the New Year's Eve party in 1940. What I love about Adaline outfits is that she clings to these iconic pieces she loved, over different periods and once we got to 'present', when Ellis and Adaline meet, she's using a combination of amazing vintage pieces.

Making this film impact your thoughts on becoming a mother in any way?

BLAKE: I've always been very close with my family, my nieces and nephews, so it was a very natural thing for me to understand the love story between Adaline and Flemming. To me, that's the most common relationship in the film, even more than the relationship between Adaline and Ellis.

Gina FERNANDEZ

Born in Barcelona in June 1992, she is 22 years old; measuring 1.60 and her measurements are 85-60-85

" I am a student of administration and finance, but always passionate about the world of fashion and interpretation, so with nine years my parents decided to sign me up for a modeling agency. At 16 I studied in a school of modeling both drama and protocol, photographic posed and makeup. But it wasn't until two years ago I started working as a photographic model.

In this time I have been on the cover of the September edition of the magazine Motor Club Magazine, I was a finalist in the 2014 Interviú Girl contest and participated in several photographic projects. I'm a perfectionist, demanding and self-critical person with myself in my work, I try to give my all to be reflected in the results.

In my private life I'm a simple and very familiar woman. When they asked me what I wanted to be as an adult, I answered Mom. I declare unconditional lover of animals; despite the image of strong woman, I am very sensitive and emotional.

The type of photography that I feel the most comfortable with is the boudoir, lingerie and fashion; if a woman feels sexy, the result of the photographs may be more than outstanding. I hope to find the right course and to devote professionally to interpretation. On camera I feel at home and try to learn from every one of my works. "

‘I am a very outgoing person, very cheerful and perhaps too sensitive and emotional.’

Let's talk about your personality, how do you define yourself?
I'm a very outgoing person, very cheerful and perhaps too sensitive and emotional.

What is your greatest virtue?
I think this same sensitivity that describes me. Although in some situations it may be a defect, I think that being in that way allows me to have a degree of awareness that maybe other cooler people don't have.

What part of your body are you most proud of?
Of my eyes, no doubt.

What is your ideal man?
Attentive, loving, outgoing and very sincere. Above all, honesty is the most important.

What's the first thing you notice in a man?
In his hands. Well-manicured hands, with long, slender fingers ... I see them extremely attractive!

“I like to let myself go, I enjoy seeing my partner in the dominant role, although sometimes I prefer to be in control.”

How should we conquer a beauty like you?
Making me laughs, but not giving me ears.

How do you conquer a man? Tell us a little of your weapons
I am cheerful, loving and very outgoing. I try to be myself at all times; I think it is something they value.

Any confesable secret?
I can’t leave home without my heels!

In love, do you like to be in control or are you the type who gets carried away?
I like to let myself go, I enjoy seeing my partner in the dominant role, although sometimes I prefer to be in control.

How you are in privacy?
Very dedicated, sweet ... Maybe sometimes cloying, even!

And to end. What are your plans for the future?
Marry, raise a family and grow as a person, both personally and at work. And I hope to keep in front of the goal a few years.

THE BEST SEX THAT EXIST!

By José Vidal

Why morning sex is the best?

What would life be without the small pleasures and great moments that make human existence worth every day? The smell of freshly cut grass, in the weekend turn on the TV and is showing your favorite movie, a hot chocolate with churros on a winter day, see snow on Christmas Day, shopping or dining with friends, discover in the mobile a message from that guy or girl you've met and whom you couldn't get you out of your head···

It's those little moments that make you an adrenaline rush and make you feel the center of the universe. Same thing happens with sex. Although well, although sex with the person you like and attracts you is something that generally is always special, there are moments that can be described as absolutely unique and indescribable.

And one of those moments is morning sex.
And is there may be something better than wake up hugging the person you want, like, love, whispering beautiful words and caressing at that time of day when you are more vulnerable? Not to mention how much we like to be in bed longer. We all love to stay in bed a few minutes more and if is in good company, there's no better excuse. The morning sex is like coming home after a night out and eat the food that you like. Is this impulsive, decadent, yet comforting desire.

And you feel so good. Moreover, it’s not only the morning sex is something beneficial for the rest of the day, is that studies conducted by researchers claim that people who do morning sex are happier and healthier people.

Yeah, see that smile and shine in the face that reveals you and it says, "You just fuck" isn’t just an urban legend, is something real.
But besides all the above, there are all other reasons why the morning sex is something much more than pleasure:

1. You can skip that day going to the gym
Because seven o'clock wake up to go to the gym especially in winter it’s uphill, but if it’s to make love, then you take it in a different way, even look forward to.

It is a better alternative to your daily routine in the gym, as some studies have confirmed that an hour of sex burns as many calories as thirty minutes of jogging.

2.You will be sober, So you will live it and remember it very clearly
You can tell all your friends with chapter and verse. There will be no gaps, although to be honest, women have memory even drunk something that fails us for men in this state of drunkenness. But sex between two sober people implies that there is something beyond it. It’s desired sex with the lights on, not the result of a night of partying and drinking.

3. Why will be more effective than a cup of coffee? Fingers and sensual kisses caressing your back wake you up faster and in a less harmful manner than a coffee cups. And get addicted to secure morning sex isn’t harmful to health.

4. Why do you love to have excuses to show off at work?
Partner: "Good morning"
You: "Good no, really good, I've had a lot of making love this morning before I came."

5. You are already naked. So all the sexual act is much faster ... openly and with no garments

6. You start the day with an orgasm
And surely will end up the two in the shower smiling and singing. So probably that feeling of happiness last all day ...
Well, if all that I've told you for morning sex don’t convince you, you can also try to make love before eating, it's also fun and it will open your appetite.

LAS NUBES DE MARÍA

CLOUDS OF SILS MARIA

The film nominated for the Palme d'Or, Clouds of Sils Maria. Juliette Binoche reunited with the prestigious French director Olivier Assayas (Paris, I love you) in this drama on film, theater and fame.

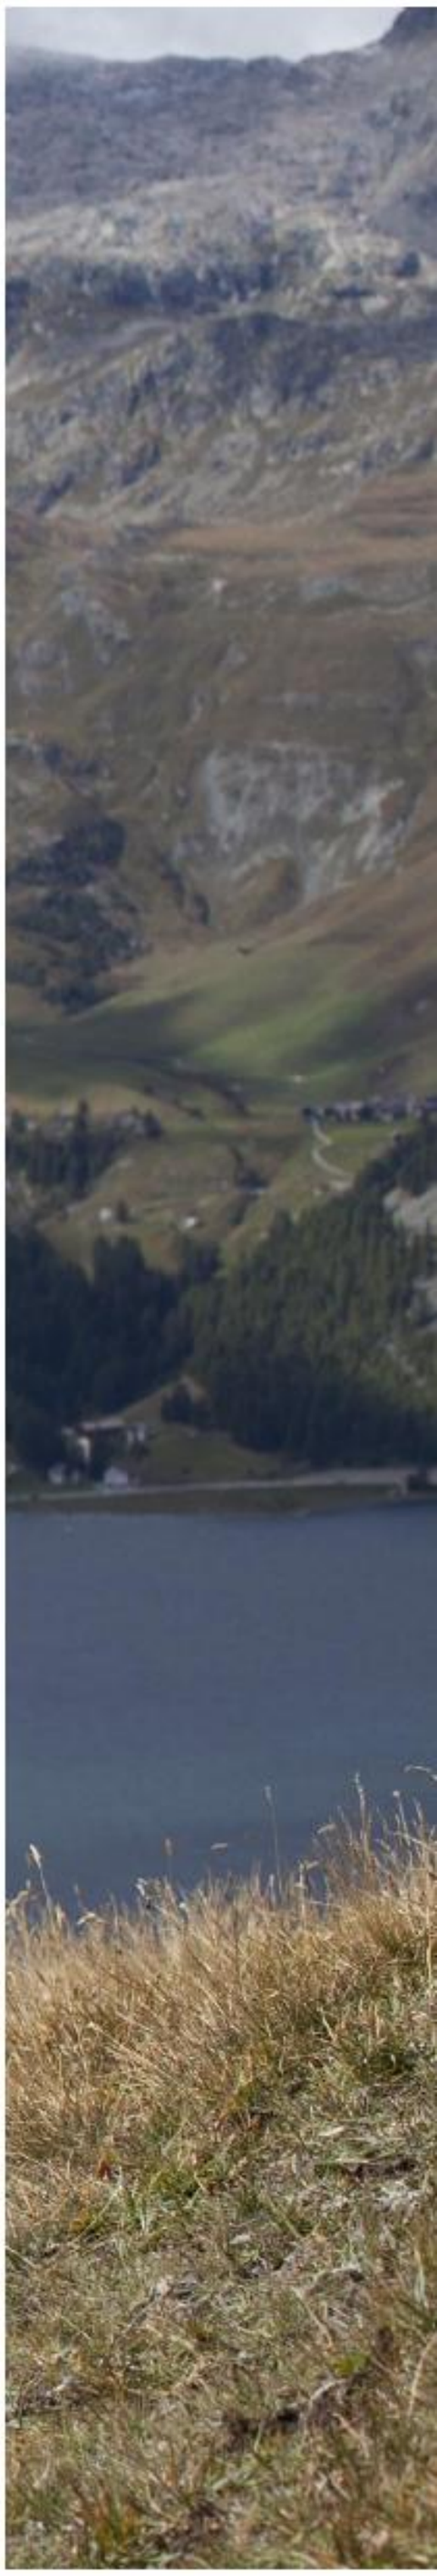
María (Binoche), a veteran actress, is faced with the dilemma of acting again in a new version of the play that made her famous decades ago. 20 years ago she played Sigrid, an attractive young girl who seduces and eventually leads her boss, Helena, to despair. Now, in the decline of her career, María must decide whether to accept the other paper, the veteran Helena, who lives a terrible end.

Assayas's latest production offers the most challenging performances of Juliette Binoche and Kristen Strewart. For playing Valentine, the young assistant of María, last February 19 Stewart became the first American to win a Cesar Award, the highest award of France.

The film won a total of six nominations, including Best Actress for Binoche and Best Screenplay, Best Director and Best Picture. Floating Clouds Director Note This film, dealing with the past, our relationship with it, has a long history. One that Juliette Binoche and I shared implicitly.

We met for the first time at the beginning of our careers. Along with André Téchiné, I wrote Rendezvous, a story full of ghosts where she, at the age of 20 years, had the lead role. Even then, the film looked at the way that a young actress takes to get satisfaction on a role. From that, our paths were parallel, intersecting only much later when we recorded Summer Hours in 2008.

It was Juliette who had the feeling that there was a missed opportunity, or rather, a film that remained as virtual in our shared history, and would bring us back to basics. With this same insight in mind,



Press: Prensa Cine Colombia

I started taking notes, then giving life to the characters and finally to the story that was waiting to exist for a long time. Writing is a path, and this is in the dizzy heights, suspended in time between the origin and the being. It's not a surprise that it inspired on me images of mountain landscapes and steep roads. We needed to have the light of spring, the transparency of the air, and the mists of the past, these from the cloud phenomena of Maloja. A path that brought me to where it all began for Juliette and me, and where we are today, in our questions about the present and especially the future. Mary Enders is an actress, with her assistant Valentine, explores the richness and complexity of the characters created by Wilhelm.
